FACILITIES PLANNING

An architect or licensed engineer may be retained to prepare plans and specifications for capital improvements, public works construction or repairs and renovations of existing public works or facilities, wherein the estimated cost equals or exceeds the amount now stipulated or as hereinafter amended by law to require advertisement for sealed bids.

In addition but not limited to the following, said engineer or architect shall provide for advertisement and make recommendations regarding acceptance of bids, awarding of contracts, bid bonds, performance bonds, provide construction inspection and approve payments and final acceptance.

Revised: April, 2009
